

# More Information

## \* Me:

- \* <https://indegoc.com/> - Page with block-type charts of each station (and historical graphs made using Highcharts). Clearly, I'm not a designer!
- \* <https://www.highcharts.com/blog/post/250-tracking-bike-share-usage-in-philadelphia/> - A blog post that I wrote for Highcharts.com, after originally using it for historical data via PHP

## \* RideIndego:

- \* [https://gbfs.bcycle.com/bcycle\\_indegoc/gbfs.json](https://gbfs.bcycle.com/bcycle_indegoc/gbfs.json) - A more minimal API for the Philadelphia bike-share that uses a different standard (GBFS) than the flat GeoJSON file
- \* <https://www.opendataphilly.org/organization/city-of-philadelphia?q=indegoc> - OpenDataPhilly list with additional details about the API(s)

## \* Randal Olson:

- \* These two blog posts were my first inspiration for visualizing bike-share usage:
  - \* <http://www.randalolson.com/2015/07/18/visualizing-indegoc-bike-share-usage-patterns-in-philadelphia/>
  - \* <http://www.randalolson.com/2015/09/05/visualizing-indegoc-bike-share-usage-patterns-in-philadelphia-part-2/>
